

## 2023 Subject Index

|  |  |  |            |
|--|--|--|------------|
| Alpha rhythm .....                           | 31   | Neurology.....                                       | 105        |
| Antioxidant effect .....                     | 9  | Neuropsychological evaluation.....                   | 87         |
| Benign familial infantile epilepsy.....      | 121  | Nociception.....                                     | 126        |
| Biomarker.....                               | 37   | Non-convulsive status epilepticus.....               | 31         |
| CADASIL .....                                | 34   | <i>NOTCH3</i> gene.....                              | 34         |
| Cardiac conduction disorders.....            | 105  | NREM parasomnias .....                               | 62         |
| Cardiac side effect.....                     | 105  | Outdoor sports.....                                  | 1          |
| Children.....                                | 26   | Oxidative stress.....                                | 9          |
| Cognitive functions.....                     | 16   | Paroxysmal kinesigenic dyskinesia.....               | 121        |
| Collective ground sports .....               | 1  | Pfizer biotech .....                                 | 50         |
| Complete blood parameter indices.....        | 75   | Physical exercise.....                               | 1          |
| Confusional arousal.....                     | 62   | Platelet.....  | 75         |
| COVID-19 vaccination .....                   | 50   | Polytherapy .....                                    | 46         |
| Diagnosis.....                               | 56   | Pregnancy.....                                       | 69, 75, 79 |
| Digital neuropsychology.....                 | 16   | <i>PRRT2</i> .....                                   | 121        |
| Electrocardiography.....                     | 105  | Quality of Life Scale in Patients with Epilepsy..... | 83         |
| Electroencephalography.....                  | 26   | Relatives.....                                       | 111        |
| Engel classification .....                   | 115  | Routine EEG.....                                     | 91         |
| Epilepsy.....                                | 1, 26, 37, 46, 50, 56, 75, 79, 83, 96, 126 | S100B.....   | 37         |
| Epilepsy Disease Concealment Scale .....     | 83   | Salzburg criteria .....                              | 31         |
| Epilepsy surgery.....                        | 115  | Seizure risk.....                                    | 111        |
| Epileptic paroxysmal arousal.....            | 62   | Seizure-free.....                                    | 91         |
| Focal epileptic seizure.....                 | 34   | Sialic acid.....                                     | 41         |
| Fucose .....                                 | 41   | Side effect .....                                    | 50, 126    |
| GAERS.....                                   | 69   | Sinovac-coronavac.....                               | 50         |
| Gene expression.....                         | 96   | Sleep-related hypermotor epilepsy.....               | 62         |
| Generalized non-reactive alpha activity..... | 31   | Sports .....   | 1          |
| Grey zone .....                              | 31   | Status epilepticus.....                              | 21         |
| Gymnastic .....                              | 1  | Status epilepticus etiology .....                    | 21         |
| Hepatotoxicity.....                          | 9  | Status epilepticus in-hospital mortality.....        | 21         |
| Hexosamine.....                              | 41   | Stigma .....   | 83         |
| Hexose.....                                  | 41   | Stomach.....   | 41         |
| Hyperoxia.....                               | 96   | Sudden unexpected death in epilepsy .....            | 111        |
| Hypothyroidism .....                         | 46   | Survey .....   | 111        |
| Idiopathic generalized epilepsy.....         | 16   | Synaptopathy.....                                    | 121        |
| Inflammation.....                            | 75, 79                                     | Temporal lobe epilepsy.....                          | 115        |
| Juvenile myoclonic epilepsy.....             | 87   | Trigeminal pain .....                                | 126        |
| Lamotrigine.....                             | 105  | Vagus nerve stimulation.....                         | 126        |
| Levetiracetam.....                           | 69   | Valproic acid .....                                  | 9, 41, 69  |
| Long-term EEG.....                           | 91   | Video-EEG monitoring.....                            | 56         |
| Martial arts.....                            | 1  | Video-electroencephalography.....                    | 56         |
| Maternal behavior .....                      | 69   | Visual spatial functions.....                        | 87         |
| Moringa.....                                 | 41   | Vitamin b6.....                                      | 9          |
| Neonatal hyperoxia .....                     | 96   |  |            |
